From the Editor-in-Chief's Desk

Dear Readers

The new issue of the e-Newsletter, "The Civil Engineer" is before you carrying the normal information about the growth of ICE(I).

This issue contains two articles titled

- (i) **"Women in Civil Engineering"**
and
- (ii) **ICID joins initiative to promote "Water for All-Leaving No One Behind" World Water Day 2019.**

Both the articles are very interesting as the authors have dealt with the respective subject in a very precise and informative way. In the first article the author has given information on first few lady Civil Engineers and their contribution. Author has very lucidly brought out the reasons why women are not preferring Civil Engineering Profession. However, the perception is changing now because of the specialization and various types of job opportunities specially in Teaching, Research and Designs. One can see

many women Civil Engineers in field too and thus helping to believe that this profession is an equal opportunity field. The second article deals with water which means life. SDG-6 says water for all by 2030. This article reminds us what we should do on World Water Day (22nd March). The article teaches us importance of water specially safe water for marginalized group by adopting integrated water management plan. For this ICID suggest there three pronged strategy –Learn. Share and Act.

ICE(I) is moving ahead with its usual being member of ACECC, the Institution will represent Country at the next ECM being held at Tokyo, followed by CECAR which is held every 3 years. India will also host the ECM in September, 2019 in Goa. In 2022 and also we will host the ECM & next CECAR in Goa. A large number of National and International delegates will attend these events of great importance.

Success of all such events depends on the cooperation of all concerned and that is what we are looking forward.

With my best wishes.

Dr. S.L.Swamy
Chairman

Be grateful for your problems, for they stimulate an "I-can-solve-it" attitude.

From the Editor's pen

Dear Readers

The first issue of the e-Newsletter titled "The Civil Engineer" has been released with usual features.

Time is running at its usual pace. We were in 2018 and now we are standing at the end of the first quarter of the year 2019. This process of change will go on and on and we shall enter the New Year 2020 and so on. Old systems are changing and new concepts are emerging. Today's new will be tomorrow's old. Time is having affect on human beings also. Children are getting young and young ones are getting old and some old are departing, leaving

behind, their sweet memories. This is how the cycle of time is moving on. Everything is in the hand of God. He is the creator and destroyer too. Creations and destruction have to go simultaneously otherwise there will be no place to breath. Even God is the great balancer and He knows what is best. We, as human beings cannot do anything and must-bow before Him accepting what - ever is destined for us, doing our job well. As they say, God helps those who help themselves. With that sprit, let us place our foot forward to the next quarter of 2019 hoping for something interesting and new for us to make a better world to live in.

Prithipal Singh
Secretary General

If your actions inspire others to dream more, learn more, do more and become more, you are a leader.

WOMEN IN CIVIL ENGINEERING

As humans, both man and women are fundamentally very similar in nature. However, It is the socio-political pressure, which creates differences to bring in biases. Er. Snehal Joshi sheds light on the challenges for women in civil engineering.

India has seen tremendous growth in infrastructure and industrial development over the last few decades. Construction is the second largest industry in India. Considered a totally male dominated field, the construction industry has been thriving on unskilled women labourers.

Women account for nearly 51% of the construction labour force. Even though, the percentage of unskilled women is high on construction site, the female-to-male ratio in a class of civil engineering is hardly one-fourth. Nearly 20% of women continue to work in the field of civil engineering, while others move on to pursue different fields. This article looks into different aspects of civil engineering, which is equally enthralling, encouraging, as well as, demanding for women in the field.

History of Women in Civil Engineering

During the early years, women, who were instrumental in science and engineering were looked up to as inventors. It is during the World War II, they were formally brought into engineering education. At the beginning of the 20th Century, there were a few women, who took engineering programs. In 1905, Nora Stanton Blatch Barney graduated as the

first woman Civil Engineer from the Cornell University.

A few years later, Olive Dennis became the second to graduate as a Civil Engineer in 1920. Initially, she worked as a draftsman in Baltimore and Ohio railroad. Later on, she worked as a service engineer. As a service engineer Olive Dennis brought in many changes in the railway system for the safety and comfort of passengers.

Emily Warren Roebling is well-known for her timeless contribution towards the completion of Brooklyn Bridge after her husband's ill-health. She was, one of the first lady field engineers of her times. These women and many more have paved way for the modern-day women civil engineers to make their mark.

Less Preferred Profession

As per the Forbes magazine, there are only 12% of women, who prefer jobs in engineering, in spite of it being one of the highest paying and fast growing field. It is also interesting to note, there are only about 5% of women in engineering managerial positions. In civil engineering, women are in minority. As civil engineers, they can earn three to four times more than the most preferred jobs like nursing, teaching, etc. Even though, the percentage of women in design and analysis is more, it is not wrong to conclude that construction is a male dominated discipline so far.

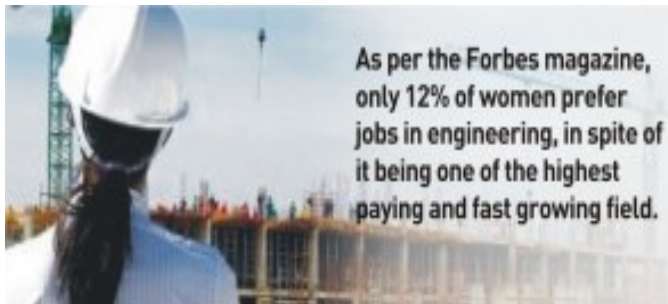

Site work is the common perception of work in civil engineering, which is far from the truth. Even though, site work contributes to the trade by 40%, the main aspects such as design, analysis, quantity surveying, estimation etc., are primarily office-based jobs. Gone are the days, when everything used to happen manually. Technological boom has brought in a lot of convenience to ease cumbersome tasks like design, drafting, estimating, planning and management. Apart from the knowledge of core construction fundamentals, the construction industry is in short supply of professionals, who are adept with IT skills.

As per WISE Women in Science and Engineering, there is a steep downfall in women persuading career in science and engineering.

Here are some of the factors which prevent women to work in the field of civil engineering:

- It is male-dominated
- Lack of inspiration
- Lack of adequate societal or institutional support
- Lack of appropriate infrastructure and facilities
- Lack of flexibility
-

Male Domination

As per the Forbes magazine, only 12% of women prefer jobs in engineering, in spite of it being one of the highest paying and fast growing field.

Male domination is omnipresent in every

industry. Multiple issues related to gender bias and wage disparity have been fought over, by women over ages without any conclusion. Civil Engineering is male dominated due to the nature of its work. However, it is very important to note that the same site work is being performed by women labourers. In fact, their number is nearly equal to their male counterparts. This is one of the best reasons, why women civil engineers should shed their inhibition about male domination in the sector.

Lack of Inspiration

With very few women taking up civil engineering to continue as their career, there is lack of inspirational stories or personalities to emulate.

Successful lives of fellow professionals are inspiring. One relates the issues they have been facing and how they have maneuvered to acquire success in the respective fields. With very few women taking up civil engineering to continue as their career, there is lack of inspirational stories or personalities to emulate. Lack of mentorship for women also add to the woes in civil engineering industry. Nowadays, there are many organizations in the domain of construction supporting women working in civil engineering industry. Needless to say, the awareness level is far least amidst professionals. Attending alumni meetings and mentoring should be a part of the professional training to bring women face-to-face with the industry's Who's Who to aid in networking.

Lack of Societal and Institutional Support

The age-old saying 'Behind every successful woman, there is a man' should be given more emphasis to attract women in the field of civil engineering. Women have been working since ages doing all household chores. Family members and their life-partners have been responsible to inspire or inculcate such possibilities. Lack of societal and family support hamper the will in women to work long hours, travelling long distance etc. The 21st Century women are far fortunate to receive appropriate societal and institutional support on the work front. However, this can still be improvised to encourage women in this field.

Lack of Appropriate Infrastructure and Facilities

The women laborers working on the sites often face improper sanitary conditions. Instead of thinking it as an extra liability, the sanitary conditions need to be improved on the construction sites for women employees to make use at ease. Even though, there are different regulations and standards, which are applied for construction sites, sanitary regulations need to be adhered too.

Lack of Flexibility

Women find it easy to work on different engineering disciplines due to the flexibility the job provides. The construction industry needs to be more organized, in terms of, flexible work timings. As of now, flexibility is a huge issue for women to thrive in the field of civil engineering.

Dreary Image in the Society

Total number of women working in science, technology, engineering and mathematics are low. Women working in the engineering field is the lowest of the all. The dreary image of the profession prevents them to continue working in the same field. Construction workers come from all strata of society and civil engineers have to deal with all types of people on the sites. It is also difficult to ignore the unsavory comments being passed by fellow men, in spite of women's ability to work as equals or excel better than their male counterparts. Women tend to shy away from civil engineering to prefer other profession because of its lackluster image in the society.

Women Impact

The construction industry needs to be more organized, in terms of, flexible work timings for women

Civil engineering is a very inclusive discipline. The core of construction engineering can be supported with numerous disciplines, tools and techniques. The ancillary fields, which are congruent to civil engineering are structural design, architectural design, water resources, space planning, landscape designing, MEP design and many more.

Every phase of construction is carefully planned and executed. It is, at the level of execution when one needs to supervise the site work with great efficacy and efficiency.

History of a few women field engineers, involved in mega projects, without appropriate tools and techniques is not been accepted by the industry. Women in the 21st Century certainly have enough technological ammunition with them to actually prove that they can make a better impact in the construction industry.

In the five phases of construction's life cycle the first phase is Initiation. It involves coordination with different people actively involved in construction of the new structure. The feasibility study needs to be carried out while choosing the project, needs analysis and thorough understanding of numbers. Further more, it needs coordination and management. Women are better in multi-tasking because of nature's creation. They tend to be good managers, as they have the innate ability to think about different variables affecting the situation. Women can be considered as good project initiators and managers.

Every project has a design element in it. Design is one huge aspect of civil engineering, which can actually become a game changer for women in the field. Design is one such discipline, where there can be 80% of work is done in office while 20% are on the site. Analytics and aesthetics are looked after in design. Women are analytical in nature and have a good sense of aesthetics. Designing is a discipline, which can be called as the dependable craft for women in civil engineering.

Structural designing is a preferred branch of civil engineering. Among the notable and renowned high-rises, Elma Wilson was the first lady structural engineer to have worked on the historically significant Flatiron Building in Manhattan, New York. It is noteworthy to say, there are quite a few women structural engineers in India, who have been involved in many important projects.

Similarly, there are many challenging and interesting branches of civil engineering for any professional. Even though, there are many women architects in the field of architecture, sadly, there are very less women civil engineers in India and in other parts of the world. This certainly shows the conceptualization and design are some aspects, in which women can find their niche. Even though, there is less number of women on the field, they are not less than any of their counterparts. With more than 50% women labourers as construction work-force, women are able and suitable for the field work as civil engineers.

The overall safety of an unskilled woman construction worker is jeopardized sometimes. These women are molested and treated badly on site by different category of people, with whom they have no option to work with. Such instances can be minimized, if more women civil engineers make their presence on to the field.

Like all the other fields, civil engineering too, has many advantages than disadvantages. It is just a matter of perception, few specific experiences and biases, which build in to make civil engineering as a male bastion.

Civil Engineering a Rewarding Career

With more than 50% women labourers as construction workforce, women are ideally suited for field work as civil engineers.

A good academic performance and better job prospects draw women towards civil engineering. The percentage of women engineers have steadily increased from 1.8 to 7.9 in the last five to six decades. There is a constant rise in the number of women receiving degrees in engineering. However, there is a steep decline in the number of women engineers getting employment after their graduation. There are plenty of reasons for this. Woman civil engineers take for granted the job would demand long and tough hours on site or on the field. The employers continue to discourage women on the lines of safety and challenges, that are a part and parcel of being a civil engineer. Often fragility, less stamina and long hours of work are given as the main reasons for women not being encouraged to take up this profession. However, with CAD and other technological advancements, women are now able to pursue their career in the field of civil. This is one of the major reasons, why women are drawn towards civil engineering in the modern era. Civil engineering is a rewarding profession for women because of its creativity and sheer perseverance with which an idea has to be manifested as a building.

Contributing to the creation of long lasting structure and seeing it standing through the decades is exhilarating. It is also a

matter of pride to see the buildings standing tall, which was conceived on paper.

Conclusion

Civil engineering is a rewarding profession for women because of its creativity and sheer perseverance with which an idea has to be manifested as a building.

It is always better to go after the historical journey to understand a particular aspect when there are too many biases- The history of women in civil engineering is glorious in nature. As a human being, men and women are fundamentally are very similar in nature. It is the socio-political pressure, which creates differences to bring in biases. Civil Engineering has some aspects and there is a need to be looked into to encourage women workforce to join the sector. In the IT sector, women are given flexibility. Similar attempts should be made, taking into account different variables of the construction industry. Human Resource policies should be reconsidered and made appropriate for women working in construction companies.

Male domination is one of the biggest obstacles, however, the modern era women should move past this baggage to continue to prove their mettle in this field. With good core knowledge, analytical skills and leadership qualities, women are capable of leading the construction industry too. If we look at the Banking sector, there are many job opportunities for women.

It is interesting to note, women work long hours and work on fields as well. The difference between the nature of work of both the industries is not much but there is a lot of difference in perception. The way banking is looked at, as an industry and the way civil engineering is looked at, the difference is evident. Less awareness about the sensitive issues, lack of improvisation on different women friendly aspects, leadership, knowledge and most importantly status quo are some of the factors responsible to civil engineering industry as a male dominated one. Considering the number of women workers working on the construction site, there is a need of women civil engineers to work on sites without keeping the barrier of difficult working conditions.

In the olden days, women have made it a point to work as civil engineer despite being in a totally different societal setting. Today, with many technological advancements in place, it is the right time to step in and pave ways for fellow women civil engineers. With the right attitude, in future all these small pieces will fall together and one can say that civil engineering is no more a male bastion, it is indeed an equal opportunity field.

ICID JOINS INITIATIVE TO PROMOTE 'WATER FOR ALL – LEAVING NO ONE BEHIND' WORLD WATER DAY 2019

Water means life. It acts as the mirror of nature and creates an environment that sustains and nurtures plants, animals and humans, making Earth a perfect match for life in general. Climate change and population growth are making the world's water woes more urgent. And they are exacerbated by bad management. The present-day world provides ample examples of environmental devastation that serve as a warning that water usage has its natural limits.

World Water Day (WWD) is celebrated on 22 March every year. Initiated by UN-Water, the theme for WWD 2019 is "Leaving no one behind." Sustainable Development Goal 6 is crystal clear: water for all by 2030. In principle, this means leaving no one behind. But today, billions of people are still living without safe water – their households, schools, workplaces, farms and factories, struggling to survive and thrive. Marginalized groups – women, children, refugees, indigenous peoples, disabled people and many others – are often overlooked, and sometimes face discrimination, as they try to access and

manage the safe water they need.

This World Water Day, 22 March, is about tackling the water crisis by addressing the reasons why so many people are being left behind. Integrated water management plan is required for health, environment and sustainable economic development. WWD aims to sensitise people about the significance of fresh water and to promote sustainability for fresh water resources management.

Towards this endeavour, ICID aims to raise the awareness and responsibility of the community for the protection, exploitation and sustainable development of water resources, as well as improve the response to natural disasters and adaptation to climate change. ICID will observe the day with a view to stimulate global awareness and to encourage people to become active participants to sustain life by saving water. All the National Committees/Committee are invited to commemorate this day (22 March) by organizing events/workshops/seminars/consultations/brainstorming sessions in their respective country.

Awareness can be disseminated in the form of ideas enabling a knowledge transfer environment by way of participation in these events. ICID would appreciate receiving feedback from their NCs highlighting WWD celebration in the form of a brief report along with high resolution images latest by 31 March

ACT - Gather people together to share ideas and make them grow. Hold or attend an event to make personal connections that could help people living without safe water.

Water Thought: Once you carry your own water, you will learn the value of every drop.

2019 for its coverage in ICID News Update and other related publications.

WATER FOR ALL >> How you can contribute?

LEARN - Get familiar with the issues –why are people being left behind without safe water and what can be done to reach them?

SHARE - Engage your friends and contacts with information and stories about the reality of the water crisis and how it affects every aspect of society.

Source & credit :

More information on WWD 2019 is available @ <http://www.worldwaterday.org>

ADD TO YOUR VOCABULARY

- **I-Joist**
An engineered structural floor or roof joist consisting of a top and bottom chord of dimension lumber and a web of oriented strand board. Also known as Silent Floor.
- **Keene's Cement**
A white finish plaster that produces an extremely durable wall. Because of its density, it excels for use in bathrooms and kitchens and is also used extensively for the finish coat in auditoriums, public buildings, and other places where walls may be subjected to unusually hard wear or abuse.
- **Inside Corner**
The point at which two walls form an internal angle, as in the corner of a room.
- **Longitudinal Bracing**
Bracing that runs lengthwise with a bridge and provides resistance against longitudinal movement and deformation of transverse members.
- **Inside Drain**
A roof drain positioned on a roof at some location other than the perimeter. It drains surface water inside the building through closed pipes to a drainage system.
- **Mansard Roof**
A roof which rises by inclined planes from all four sides of a building. The sloping roofs on all four sides have two pitches, the lower pitch usually very steep and the upper pitch less steep.
- **Interior Girder**
An innermost girder supporting the bridge floor.
- **Marina**
A facility located on a body of water which provides docking, storage, maintenance and other facilities for boats.
- **Isotropic**
Have the same material properties in all directions.
- **Parapet Wall**
A low wall around the perimeter of a roof deck

मानव संसाधन विकास मंत्रालय
(उच्चतर शिक्षा विभाग)

नई दिल्ली, दिनांक 6 नवम्बर 2007

सं.एफ. 24-1/2007-टी.एस.।।। शैक्षणिक योग्यताओं को मान्यता प्रदान करने के लिए उच्च स्तरीय समिति की दिनांक 22 मई, 2007 की बैठक में की गई सिफारिशों के आधार पर भारत सरकार ने उपर्युक्त क्षेत्र में केन्द्रीय सरकार की सेवाओं तथा पदों पर रोजगार देने के उद्देश्य से शैक्षणिक सत्र, 2007-08 से सिविल इंजीनियरी संस्थान (भारत), लुधियाना (पंजाब) के अखिल भारतीय तकनीकी शिक्षा परिषद द्वारा अनुमोदित पाठ्यचर्या अनुसार संचालित सिविल इंजीनियरी और वास्तुकला इंजीनियरी पाठ्यक्रमों में एसोशिएट सदस्यता पाठ्यक्रम की धारा (क) और (ख) को डिग्री के समकक्ष और तकनीकी इंजीनियरों (त) के भाग I और II को डिप्लोमा के समकक्ष मान्यता प्रदान करने का निर्णय लिया है। यह मान्यता इस शर्त के अधीन होगा कि अभ्यर्थियों की कुल संख्या उक्त परीक्षा के लिए सम्बन्धित संस्थान की अधिकृत अखिला क्षमता से अधिक नहीं हो जिसके साथ सिविल इंजीनियरी संस्थान (भारत), लुधियाना (पंजाब) ने संगम ज्ञापन किया है। मानव संसाधन विकास मंत्रालय एक वर्ष के बाद अखिल भारतीय तकनीकी शिक्षा परिषद के माध्यम से शैक्षणिक योग्यताओं की मान्यता की पुनरीक्षा करेगा।

रवि माथुर
संयुक्त सचिव

**MINISTRY OF HUMAN RESOURCE DEVELOPMENT
(DEPARTMENT OF HIGHER EDUCATION)**

New Delhi, the 6th November 2007

< No.F.24 – 1 / 2007 – TS.III. On the recommendations of the High Level Committee for recognition of Educational Qualifications in its meeting held on 22nd May 2007, the Government of India has decided to give recognition to the Section A & B of Associate Membership course, equivalent to Degree and Part – I & II of Technician Engineers (T) equivalent to Diploma in Civil Engineering and Architecture Engineering Courses conducted by the Institution of Civil Engineers (India), Ludhiana (Punjab) as per syllabus approved by All India Council for Technical Education (AICTE) w.e.f. the academic session 2007 – 2008 for the purpose of employment to the posts and services under Central Government in the appropriate field. It is subject to the conditions that the total number of candidates who can be admitted for the said examination would not exceed the authorized strength of the concerned Institutions with which Institution of Civil Engineers (India), Ludhiana (Punjab) has entered into Memorandum of Understanding (MOUs). A review in respect of recognition of educational qualifications shall be made by Ministry of Human Resource Development after one year through All India Council for Technical Education (AICTE).

NOTIFICATION OF ECI REGISTRATION IN NATIONAL REGISTER OF PROFESSIONAL ENGINEERS

- 1) **Introduction:** Registration of Professional Engineers, Associate Professional Engineers, Student Engineers, and some other categories on a voluntary basis is going on since 1 December, 2015. Member Associations (MAs) have a major role to play as they call for applications, screen them through their set up National Committees (NCs) for respective fields/disciplines of engineering. These NC give their recommendations to the Board of Registration of Professional Engineers (BRPE), set up by ECI and its member associations.
- 2) **Benefits of Registering:** The Registration, enhances the credibility and image of the Engineer. His/her acceptance by industry, institutions, clients and other organisations goes up when he/she mentions the fact of this registration as PE (or APE or SE) which distinguishes him/her from those who are not registered. We are informing the various government departments, public sector organisations, local authorities, industry associations regarding the National Register. Specifically, it will result in :
 - (i) Better credibility and possibility to make use of the branding of ECI and concerned Member Associations, as the names are being listed on the website.
 - (ii) Using the Certificate of Registration as PE in the National Register as a part of CV, and
 - (iii) Better prospects for assignments/jobs after this is publicised to client/employer organisations.
- 3) **National Registers:** There are separate National Registers for:
 - (i) Professional Engineer (P. E)
 - (ii) Associate Professional Engineer (APE)
 - (iv) Apprentice/Graduate Engineers (ApE)
 - (v) Junior Apprentice Engineer (JrApE)
 - (vi) Student Engineer (SE)
 - (vii) Diploma/B.Voc Student Engineer (DiSE).

The details and Criteria for registration under each category, Disciplines and Code of Ethics which the applicant has to sign, are given on the web site www.ecindia.org.

- 4) **Categories and Fee:** Initial registration fee is Rs. 3000 for PE, Rs. 2000 for APE, App. E & Jr. App. E and Rs. 1000 for SE plus applicable GST. The fee structure is subject to change in future. The registration is subject to renewal after 5 years.
- 5) **Continuous Professional Development (CPD):** All registered engineers are expected to meet the minimum CPD requirement, in their registered specialisation, before being considered for registration or renewal of registration. Nature of the programmes constituting CPD activities and credit hours to be earned are given on the web site www.ecindia.org. It is the aggregate of credit hours earned in 5-years, for each registered specialisation, that will determine as to whether a PE has secured at least 250 credit hours within his/her five years' registration validity period or not, for re-registration. MAs have a major role in organizing the CPD programmes for respective disciplines.

Alumni.....A Lifelong Relationship !

Keep it alive!

Alumni Engagement is at the core of the Institution of Civil Engineers (India). Keeping this in mind, the institution has worked towards building a strong alumni community and will continue to work in this direction.

“Alumni are the true brand ambassadors of their Alma Mater and represent it everywhere they go. They truly reflect the values of the institution from which they have graduated.

In order to actively engage our alumni, The Institution of Civil Engineers (India) encourages alumni participation to bring them together by providing a forum for meeting and exchange of views, to facilitate professional networking for mutual benefit and to contribute to the Institution’s efforts for achieving excellence in academics and research through sharing knowledge and expertise of its members in areas pertaining to academics, infrastructure, industry interactions and others, if any.

The Alumni are also invited for seminars, conferences, advancement programs etc. to enhance their learning’s which they can further use in their own respective work areas.

Keep reading this column for more news and updates on our Alumni.....!!.

The Members, who have not yet enrolled, may get in touch with us on icei.alumni01@gmail.com or at Delhi Office.
