From the Editor-in-Chief's Desk

Dear Readers

Every beginning has its end and that is true with the days, months and years also. The year 2018 has bade good bye and we have welcomed the year 2019.

Time may change, years may change but the life goes on, and one remains occupied with usual activities.

Coming to the e-Newsletter of ICE(I), we have now come to the last issue of the e-Newsletter of 2018 for the period October to December, 2018. This issue has its usual features with two special articles titled.

- (1) Flood Management Concept and Approaches.
 - (2) Modern Technologies in Waterproofing & Roofing.
- (1) Flood and droughts are the results of climate change and global warming. The climate change has its own effect on water resources system and the results unpredicted rain within short spells—flood disaster and human deaths, loss to property etc., Therefore flood management is the need of the hour. The author has tried to explain the causes of floods impact of floods and what are the flood management approaches and how a pragmatic approach can be

adopted for a reasonable degree of protection against flood damages through structural and non-structural measures.

- (2) The second article is on Modern Technologies in Waterproofing and Roofing.

Sound waterproofing solutions come as a very important aspect for safe and durable construction. The author has well explained the various types of systems with waterproofing solutions. For success of waterproofing a single product or just a modern technology is not usually enough and therefore there is need for a holistic system approach with compatible & combinable technologies for which the architects and the structural designers have to understand from the designing stage for its successful culmination.

The New Year has brought new hopes and therefore let us welcome the New Year. I wish you all a happy new year which may fulfill all your desires.

Dr. S.L.Swamy
Chairman

Too many of us wait to do the perfect thing, or wait until conditions are "just right" before we go ahead. With the result, we do nothing. The way to get ahead is to start now. Do-it-now...

From the Editor's pen

Dear Readers

This is the last issue of 2018 of the e-Newsletter-The Civil Engineer. The year 2018 has come to an end and the New Year 2019 has taken birth with all new hopes and aspirations. We feel so happy as the new year emerges. Does it mean that the previous year was not as good as we desired?. Life is a mixture of joys and sorrows. If there were occasions of feeling sad, there were moments of joy and happiness also. So will be the case in 2019. Yes, we begin the year with all joy, sharing our happiness with our family, friends and relatives. In our journey, if we find a situation which is not upto our expectation, there is nothing to feel sad

about it. If there is sadness there are, and there will be, moments of happiness also. That thought will keep us balanced to face men and matters.

Well, taking this opportunity, I wish you all a happy a bright future in 2019 and onwards. May you be prosperous and achieve whatever you have longed for in life and not yet achieved. Life goes on like commas, semicolons till a full stop comes in the life and that will be the end of life when and where that end will come, nobody knows.. Therefore let us live life to the fullest as this life will not come again, like the year gone by.

Prithipal Singh
Secretary General

There are no secrets to success. Don't waste your time looking for them. Success is the result of perfection, hard work, learning from failure, loyalty to those for whom you work, and persistence.

FLOOD MANAGEMENT CONCEPT AND APPROACHES

Flood and drought are the results of climate change and global warming. So frequent flooding and subsequent drought is the common phenomena of any River Basins all over the world. India, Pakistan, China, and Bangladesh are the tropical countries have more seasonal rains in the past. In Southern India both South West and North East rainfall occur. In recent years say for past 20 years the climate change has its own effect on water resources system and the results unpredicted rain occur within short fell. So it turns in to flood since the diversion is not possible and the storing capacity is also not adequate. If flood disaster occurs the effects are severe. Human death, loss of property, loss of natural resources and loss of water are the major threats. The flood management is the need of hour for all States and Central Governance. The subject of flood control, unlike irrigation, does not figure as such in any of the three legislative lists included in the Constitution State list, Union list and concurrence list of India. However, Drainage and Embankments, are two of the measures specifically mentioned in entry 17 of List II (State List) reproduced below :

“Water, that is to say, water supplies, irrigation and canals, drainage and embankments, water storage and water power subject to the provision of entry 56 of List I(Union List).”

Entry 56 of List I (Union List) reads as follows :

“Regulation and development of inter-State rivers and river valleys to the extent

to which such regulation and development under the control of the Union is declared by Parliament by law to be expedient in the public interest.

It may thus be seen that the primary responsibility for flood control lies with the States. A number of States have already enacted laws with provisions to deal with matters connected with flood control works. Therefore, the subject “ flood management” falls within the purview of the States. The schemes for flood control are planned, investigated and implemented by the States as per priorities within the State with their own resources and the role of central government is technical, advisory, catalytic and promotional in nature.

Both Central and State governments have their own plan of action for flood management of all river basins as per the act and National disaster Management Plan.

Casues of flood :

Flooding is occurring due to many factors as listed below.

- Due to heavy rainfall in short period.
- Inadequate storing capacity of rain water.
- Inadequate carrying capacity in the rivers and streams
- Poor maintenance of water bodies and channels.
- Encroachments in the water courses.
- Dumping of solid wastes and construction debris in the water bodies.
- Damage of hydraulic structures due to ageing.
- Unscientific ways of monitoring of the water bodies.
- Inadequate knowledge on group of reservoir operation system
- Inter State issues preventing the implementation of the River Basins Action plan
- Inter basin water transfer is not realised between States.
- Selfishness, egoistic views are closed the River basin wise approach.

Impacts of flood

Flooding is the serious disaster in rainy days. The impacts are also severe when compare with other disaster. Heavy rain pour shall result in flooding and the effects are furnished below :

- Death of human being and cattles
- Death of wild animals
- Loss of property like houses and house hold materials
- Loss of agriculture crops
- Damage of agriculture lands
- Damage of river eco systems

- Filling of agriculture lands with soil and sand
- Damage of roads and bridges
- Damage of good old heritage buildings
- Spreading of diseases
- More devastation of all properties
- Damage of all house hold goods
- Un restless in family
- Psychological effect during flood time

Flood Management Approaches

Different measures have been adopted to reduce the flood losses and protect the flood plains. Depending upon the nature work, Flood protection and flood management measures may be broadly classified as under :

- Engineering/Structural approach
- Administrative/Non Structural approach

Engineering /Structural Measures

The engineering measures for flood control which bring relief to the flood prone areas by reducing flood flows and thereby the flood levels are –

- Observing the climacteric condition during rainy season
- Effective ways of reservoir operation an artificially created reservoir behind a dam across a river a natural depression suitably improved and regulated, if necessary or by diversion of a part of the peak flow to another river or basin, where such diversion would not cause appreciable damage.
- by constructing a parallel channel by passing a particular town/reach of the river prone to flooding.
- Keeping ready with sand bags for mitigation measures
- Keep watching the reservoirs and water bodies with shift system

The engineering methods of flood protection, which do not reduce the flood flow but reduce spilling, are :

- embankments which artificially raise the effective river bank and thereby prevent spilling and
- channel and drainage improvement works, which artificially reduce the flood water level so as to keep the same, confined within the river banks and thus prevent spilling.

Administrative / Non-structural Measures

The administrative methods Endeavour to mitigate the flood damages by:

- Facilitating timely evacuation of the people and shifting of their movable property to safer grounds by having advance warning of incoming flood i.e. flood forecasting, flood warning in case of threatened inundation
- Discouraging creation of valuable assets/settlement of the people in the areas subject to frequent flooding i.e. enforcing flood plain zoning regulation.
- Warning shall be given to downstream side during heavy rainy season and during water raising in dams nearer to Full Reservoir Level.
- Precautionary measures shall be arranged to evacuate the people who live in low lying area.
- Coordination between various departments shall be well organized to take necessary action.

- As per flood mapping, flood zoning the common buildings shall be identified and kept ready for making stay arrangements.
- Volunteers from citizen group shall be available ready for helping the government officials.
- Arrangements for camp buildings, medicines, food and water, other sanitation arrangements, blankets and dresses for the affected people.
- Counseling centers for making people calm and building confidence in life.
- Estimation of loss of property and deaths.
- Fund raising activities for immediate help to be given.
- Intimation to the Central Government and requesting to support by sending army and finance.
- Coordinating all state government departments such as revenue, water resources department, fire department and fisheries department for helping the affected people.

Providing absolute protection to all flood prone areas against all magnitude of floods is neither practically possible nor economically viable. Such an attempt would involve stupendously high cost for construction and for maintenance. Hence a pragmatic approach in flood management is to provide a reasonable degree of protection against flood damages at economic cost through a combination of structural and non-structural measures.

Dr. R Ilangovan
M.E., PhD, Former Chief Engineer, PWD, Tamil Nadu, Visiting
Professor in Sri Eshwar Collage of Engineering,
Kinathukadavu Vice Chairman, Tamil Nadu Water Resources
Development Cell

MODERN TECHNOLOGIES IN WATERPROOFING & ROOFING

Arunabha Dey, National Manager-Waterproofing & Roofing

The need for efficient infrastructure is rising, and further challenges like sufficient supply of drinking water or intelligent use of limited resources are omnipresent. At the same time sound waterproofing solutions come as a very important aspect for safe and durable construction.

With changing modern construction demands more efficient waterproofing systems to suits with requirement of structures and construction speed. For example in tunnel waterproofing technologies evolved from admixture & quick setting mortar in 20th century to pre-formed single ply PVCp membrane system is 21st century.

Sika provides solutions for even the most challenging requirements with its unique waterproofing product portfolio, contributing to efficient, long-lasting infrastructure, be it for drinking water facilities (fulfilling the most stringent drinking water approvals), tunnels, bridges, basements or roof.

Then

Now

“Sophisticated roof desing for magnificent stadium with lots of details and specially designed colour, yet still needs to last long under the cold and uneasy climate. Only SikaSarnafill” could have the compentene to face the challenge 275’000 sq. fif roofing area was refurbished with Sarnafill” G410 memberance of special cololur and details. The adhered system is snow load-registant and looks extremely decorative.

SikaSamafil’ Ready to Protect the Beauty of Sophisticated Olympic Stadium, Canada

Waterproofing Mortars:

In the 1970s Sika first developed special one- and two-component, ready to use waterproofing mortars. These slurry applied surface waterproofing mortars like SikaTop Seal 107, had very low water permeability.

Today, Sika has continued this development in waterproofing mortars with additional performance characteristics such as flexibility and increased surface protection and could be sprayed.

High-Quality Flexible PVC Membranes with a Unique Compartment System:

Sikaplan sheet waterproofing membrane system was developed for waterproofing tunnels and basement structures as well as for single-ply roof waterproofing applications.

The systems include compartmentalized solutions with integrated joint water stops and control/injection sealing points for use in the event of subsequent movement or damage. This unique system allows structures to have a fully controlled permanent waterproofing system and is still the most durable and reliable waterproofing system.

Fully Bonded Sheet Membrane Systems:

With the Sika Proof A pre-applied waterproofing membrane system, Sika has continued the innovation for modern waterproofing technologies. An easily pre-applied, highly flexible, sheet membrane system that becomes fully bonded to the fresh concrete and therefore also prevents any lateral water underflow. The unique build-up of the Sika Proof system with a combination of in-house waterproofing technologies, again demonstrates Sika's innovation power.

Joint Waterproofing Systems:

Sikadur-Combiflex system, a unique joint waterproofing system for the internal and external sealing of cracks, construction and movement joints in many different types of structure.

Single Ply PVC/TPO Roofing Membrane:

Sika is one of the most experienced single ply PVC & TPO membrane producers with track record of more than 50 years. With most efficient and proven technologies Sika offers single ply membrane systems to meet customers' requirements conform to latest-standards.

The Sika range of engineered joint waterproofing systems today includes additional innovative solutions such as Sika Fuko injection hoses, Sika Swell hydrophilic profiles and sealants, Sika Dilatec Waterproofing Tapes and the complete range of Sika, Greenstreak and Tricosal Waterbars.

Liquid Applied Membrane:

Sika developed the Sikalastic range of polyurethane and polyureabased, liquid applied membrane solutions for waterproofing bridge decks, podium, roofs and basement structures. This product portfolio comprises of innovative MTC & ICure technology which helps single component PU LAM to "rain resistant in 10 minutes" and "Fast Cure".

Sika introduced a special technology of lacquer coating for PVC membranes that seals the surface of the membrane to protect it from external influences. Lacquer prevents plasticizer migration and ensures the life expectancy of the roof. Sika has wide possibilities of membranes texturing for various purposes such as an embossed matte finish, which provides a safe nonslip surface.

Injection Waterproofing Solutions:

Remedial injection sealing solutions for new and refurbishment works have also seen increasing demand in recent decades for the sealing of cracks and voids, such as honeycombed areas in concrete. Sika has developed a wide range of different injection technologies with cement, polyurethane, epoxy and special acrylate-based systems that provide solutions for our customers to solve all of their specific problems by using the most appropriate technology.

**Cessation:**

For success of waterproofing, a single product or just a modern technology is not usually enough. There has to be holistic system approach with compatible & combinable technologies. There is a need for the architects and the structural designers to understand the various systems available for waterproofing and incorporate the waterproofing system clearly and in sufficient detail at design stage, taking into consideration the in-service conditions and functional behavior of structures for durable water-proofing with modern technologies.

October, 2018

ADD TO YOUR VOCABULARY

- **Hip Rafter**
The rafter which forms the hip of the roof. It is usually made from a board that is the next size larger in width than the common rafters (for example, if the common rafters are 2x6's, the hip rafter is a 2x8).
- **Hip Roof**
A roof which rises by inclined planes from all four sides on the building. The line where two adjacent sloping sides of a roof meet is called the Hip.
- **Hip Vertical**
The vertically placed tension member engaging the hip joint of a truss and supporting the first panel floor beam in a through truss span, or instead, only the bottom chord in a deck truss span.
- **Hollow Core Door**
A door whose faces are composed of sheets of thin material with a hollow core that has been filled with a stiffening material. As opposed to a solid core door which is made of a solid material throughout.
- **Hopper Window**
Any single pieced window that is hinged at the bottom edge and swings down when opened.
- **Humidifier**
A device designed to increase the humidity within a room or a house by means of the discharge of water vapor. They may consist of individual room size units or larger units attached to the heating plant to condition the entire house.
- **Humidistat**
A controlling device to regulate or maintain the desired degree of humidity in a house.
- **Hybrid System**
A solar system that combines both active and passive elements, for example, a passive system that contains fans or blowers to aid heat circulation.
- **Hydrogenesis**
Another term for condensation. The term is especially applied to base and soil substrates under highway pavements where the barometric pump causes the inhalation of humid air, which then condenses in those structures, causing an ever increasing moisture content and sometimes instability.
- **Hygroscopic**
Attracting, absorbing, and retaining atmospheric moisture.

मानव संसाधन विकास मंत्रालय
(उच्चतर शिक्षा विभाग)

नई दिल्ली, दिनांक 6 नवम्बर 2007

सं.एफ. 24-1/2007-टी.एस.।।। शैक्षणिक योग्यताओं को मान्यता प्रदान करने के लिए उच्च स्तरीय समिति की दिनांक 22 मई, 2007 की बैठक में की गई सिफारिशों के आधार पर भारत सरकार ने उपर्युक्त क्षेत्र में केन्द्रीय सरकार की सेवाओं तथा पदों पर रोजगार देने के उद्देश्य से शैक्षणिक सत्र, 2007-08 से सिविल इंजीनियरी संस्थान (भारत), लुधियाना (पंजाब) के अखिल भारतीय तकनीकी शिक्षा परिषद द्वारा अनुमोदित पाठ्यचर्या अनुसार संचालित सिविल इंजीनियरी और वास्तुकला इंजीनियरी पाठ्यक्रमों में एसोशिएट सदस्यता पाठ्यक्रम की धारा (क) और (ख) को डिग्री के समकक्ष और तकनीकी इंजीनियरों (त) के भाग I और II को डिप्लोमा के समकक्ष मान्यता प्रदान करने का निर्णय लिया है। यह मान्यता इस शर्त के अधीन होगा कि अभ्यर्थियों की कुल संख्या उक्त परीक्षा के लिए सम्बन्धित संस्थान की अधिकृत दाखिला क्षमता से अधिक नहीं हो जिसके साथ सिविल इंजीनियरी संस्थान (भारत), लुधियाना (पंजाब) ने संगम ज्ञापन किया है। मानव संसाधन विकास मंत्रालय एक वर्ष के बाद अखिल भारतीय तकनीकी शिक्षा परिषद के माध्यम से शैक्षणिक योग्यताओं की मान्यता की पुनरीक्षा करेगा।

रवि माथुर
संयुक्त सचिव

MINISTRY OF HUMAN RESOURCE DEVELOPMENT
(DEPARTMENT OF HIGHER EDUCATION)

New Delhi, the 6th November 2007

< No.F.24 – 1 / 2007 – TS.III. On the recommendations of the High Level Committee for recognition of Educational Qualifications in its meeting held on 22nd May 2007, the Government of India has decided to give recognition to the Section A & B of Associate Membership course, equivalent to Degree and Part – I & II of Technician Engineers (T) equivalent to Diploma in Civil Engineering and Architecture Engineering Courses conducted by the Institution of Civil Engineers (India), Ludhiana (Punjab) as per syllabus approved by All India Council for Technical Education (AICTE) w.e.f. the academic session 2007 – 2008 for the purpose of employment to the posts and services under Central Government in the appropriate field. It is subject to the conditions that the total number of candidates who can be admitted for the said examination would not exceed the authorized strength of the concerned Institutions with which Institution of Civil Engineers (India), Ludhiana (Punjab) has entered into Memorandum of Understanding (MOUs). A review in respect of recognition of educational qualifications shall be made by Ministry of Human Resource Development after one year through All India Council for Technical Education (AICTE).

SNIPPETS

NOVEMBER - 2018

(i)

CEAMA's 39th ANNUAL FUNCTION

CEAMA's 39th Annual Function was held on 16th November, 2018 at the Oberoi Hotel, New Delhi. The theme was "Champions of Change-Moving Towards a Dollar Positive Industry' and addressed by Shri Suresh Prabhu, Hon'ble Minister for Commerce and Industry.

ICE(I) also participated in this event which was very well attended.

(ii)

16th National Conference on "Use of Emerging Technologies by Engineers for Economic Development' on 26th November, 2018.

16th National Conference on "Use of Emerging Technologies by Engineers for Economic Development' on 26th November, 2018 was held at CSOI Vinay Marg Chanakyapuri New Delhi. This conference was organized by the Engineering Council of India and was well attended. ICE(I) also participated in the conference.

(iii)

48th Meeting of the Board of Governors of Engineering Council of India (ECI)

48th Meeting of the Board of Governors of Engineering Council of India (ECI) was held on 26th November, 2018 at CSOI Vinay Marg Chanakyapuri New Delhi. The Secretary General ICE(I) attended this meeting which discussed important issues pertaining to the Engineering fraternity of India.

NOTIFICATION OF ECI REGISTRATION IN NATIONAL REGISTER OF PROFESSIONAL ENGINEERS

- 1) **Introduction:** Registration of Professional Engineers, Associate Professional Engineers, Student Engineers, and some other categories on a voluntary basis is going on since 1 December, 2015. Member Associations (MAs) have a major role to play as they call for applications, screen them through their set up National Committees (NCs) for respective fields/disciplines of engineering. These NC give their recommendations to the Board of Registration of Professional Engineers (BRPE), set up by ECI and its member associations.
- 2) **Benefits of Registering:** The Registration, enhances the credibility and image of the Engineer. His/her acceptance by industry, institutions, clients and other organisations goes up when he/she mentions the fact of this registration as PE (or APE or SE) which distinguishes him/her from those who are not registered. We are informing the various government departments, public sector organisations, local authorities, industry associations regarding the National Register. Specifically, it will result in :
 - (i) Better credibility and possibility to make use of the branding of ECI and concerned Member Associations, as the names are being listed on the website.
 - (ii) Using the Certificate of Registration as PE in the National Register as a part of CV, and
 - (iii) Better prospects for assignments/jobs after this is publicised to client/employer organisations.
- 3) **National Registers:** There are separate National Registers for:
 - (i) Professional Engineer (P. E)
 - (ii) Associate Professional Engineer (APE)
 - (iv) Apprentice/Graduate Engineers (ApE)
 - (v) Junior Apprentice Engineer (JrApE)
 - (vi) Student Engineer (SE)
 - (vii) Diploma/B.Voc Student Engineer (DiSE).

The details and Criteria for registration under each category, Disciplines and Code of Ethics which the applicant has to sign, are given on the web site www.ecindia.org.

- 4) **Categories and Fee:** Initial registration fee is Rs. 3000 for PE, Rs. 2000 for APE, App. E & Jr. App. E and Rs. 1000 for SE plus applicable GST. The fee structure is subject to change in future. The registration is subject to renewal after 5 years.
- 5) **Continuous Professional Development (CPD):** All registered engineers are expected to meet the minimum CPD requirement, in their registered specialisation, before being considered for registration or renewal of registration. Nature of the programmes constituting CPD activities and credit hours to be earned are given on the web site www.ecindia.org. It is the aggregate of credit hours earned in 5-years, for each registered specialisation, that will determine as to whether a PE has secured at least 250 credit hours within his/her five years' registration validity period or not, for re-registration. MAs have a major role in organizing the CPD programmes for respective disciplines.

Alumni.....A Lifelong Relationship !

Keep it alive!

Alumni Engagement is at the core of the Institution of Civil Engineers (India). Keeping this in mind, the institution has worked towards building a strong alumni community and will continue to work in this direction.

“Alumni are the true brand ambassadors of their Alma Mater and represent it everywhere they go. They truly reflect the values of the institution from which they have graduated.

In order to actively engage our alumni, The Institution of Civil Engineers (India) encourages alumni participation to bring them together by providing a forum for meeting and exchange of views, to facilitate professional networking for mutual benefit and to contribute to the Institution’s efforts for achieving excellence in academics and research through sharing knowledge and expertise of its members in areas pertaining to academics, infrastructure, industry interactions and others, if any.

The Alumni are also invited for seminars, conferences, advancement programs etc. to enhance their learning’s which they can further use in their own respective work areas.

Keep reading this column for more news and updates on our Alumni.....!!.

The Members, who have not yet enrolled, may get in touch with us on icei.alumni01@gmail.com or at Delhi Office.
